WOLSKE & BLUE
ATTORNEYS AT LAW

The law firm of Wolske & Blue has been protecting the rights of injured people for over twenty-five years. We hold the distinction of having received some of the largest malpractice jury verdicts and settlements in the State of Ohio, and are considered one of the leading personal injury and malpractice firms in the State. We have been pioneers in the area of personal injury law, and have attained favorable results for accident victims whose cases were turned down by other firms.

We do not represent big corporations or insurance companies. We represent only people like you who suddenly find themselves in need of professional legal assistance. We pride ourselves on our efforts to achieve the best possible results in every case, and on providing a comfortable atmosphere where the needs and best interests of our clients always come first. We know that competent representation can mean the difference between a secure future and one filled with doubt and uncertainty.

Jason A. Blue and Walter "Cy" Wolske, Jr.
Founding Partners

It also is of paramount importance to us that a relationship of respect, compassion and trust is established with every client and carefully maintained throughout the course of our representation.

EVALUATING YOUR CASE

Each year we investigate over a thousand medical malpractice claims and over five hundred personal injury claims. In order to successfully represent you, it is generally necessary to obtain all hospital records, doctors' records, pharmacy records and any related expense records and have them reviewed by our experts.

Sherri Harkless, RN, CCRN Martha Dowds, RN, BSN

We are in a position to recommend an appropriate course of action in pursuing your claim once this process is completed.

FEE ARRANGEMENTS

Your initial consultation is free, and there is absolutely no obligation. We are never paid a fee until there is a favorable settlement or verdict on your behalf.

"LET OUR EXPERIENCE WORK FOR YOU"

Under a recent Supreme Court decision, lawyers are now permitted to advertise their services through direct mailings. While we are not in disagreement with the Court's decision, we believe that a law firm should be chosen only after careful consideration of its reputation, experience, field of expertise and ability to meet your needs. For this reason, we urge you to proceed with caution before making this extremely important choice.

At Wolske & Blue, we know that choosing a lawyer to represent you in your personal injury or wrongful death claim is very likely one of the most important decisions you will ever make. You must be certain that the law firm you select is experienced in the ever-changing and complicated area of civil litigation so that the judicial system works for you, not against you.

That's why at Wolske & Blue, for over twenty-five years, we have limited our practice solely to personal injury law. This includes claims resulting from motor vehicle and airplane accidents, defective products and medical malpractice.

Partners Gerald S. Leeseberg,
Michael S. Miller & Warner M. Thomas, Jr.

Malpractice, whether by a physician, dentist, podiatrist, hospital or any other health care provider, is generally understood to have occurred when that provider has failed to meet a standard of care as recognized by other health care providers in the same field.

It has been our experience that by concentrating our practice in this highly specialized area, we have been consistently able to offer our clients every advantage in obtaining fair and equitable settlements. "Let our experience work for you," is our motto, and we stand behind it one hundred percent.
